

Regulated 5V

Here jumper required

Power in

This must be shortened/connected if no current sensor used

Fuse for 5 V feed

Use for ESC signals

5V out

24V in

Here diode required.  
(Purpose: avoid reverse polarity on power input.)

Here converted the 24V (or 12V) to 5V  
Here can be LM7805 line regulator with heat sink !!! or buck converter (highly recommended).  
If screw terminal required, then PBC must be changed. (Add 1-1 holes left & right)
